Mirage Aerators

Aeration at its best!

Mirage aerators are the perfect addition to any body of water to aid in clarification and oxygenation. Models are available in ½, 1, 2, 3, and 5 HP. With 3 available water spray patterns, it is easy to select the look and functionality you desire. Using a propeller to pump water through a drive structure, the Mirage series will move large amounts of water keeping, ponds, lakes, dugouts crystal clear and oxygenated economically and efficiently.

The Mirage Aerator produces a large amount of water movement with a minimal size spray. The 1/2 hp unit creates enough water movement to sufficiently aerate a 1/2 acre pond while the 1hp unit will aerate up to 1.5 acres. This aerator is perfect for aerating any body of water that requires a great deal of oxygen to prevent stagnation. All Mirage Aerators with 45m/147.6' and longer cable sets have a quick disconnect at the pump.

The Mirage 3 & 5 HP units work well in light wastewater applications or to keep water clear of stagnation in retention ponds.

Convert your aerator into a De-Icer

The Mirage aerator if accompanied by a De-Icing Kit can be used in the wintertime as a De-Icer for water fowl, fish or to prevent damage to structures in the water like docks or boats. Provide oxygen during winter and keep an opening in the ice.

Light Kit

Looking for a dramatic effect at night? Mirage aerator can be equipped with a light kit.

2 Year Manufacturers Warranty!

Applications include:

- Ponds
- Lakes
- Reservoirs
- Dugouts
- Storm water
- Wastewater

- Available in ½, 1, 2, 3 & 5 horsepower

- Standard 15m (50ft) cable on ½ to 1hp Mirage aerators

- Standard 30m (100') cable with waterproof disconnect on 1 to 5hp Mirage aerators
